

Faculty of Arts and Letters prepared me to become a competent and empathetic teacher. Moreover, thanks to knowledgeable and determined professors and other people helping with personal development I learned how to be motivated to advance in my career. I am glad to see that the faculty and its alumni are on the right track.

My studies at the Faculty of Arts and Letters helped me a lot with respect to finding a place in the community of psychologists. As an alumnus I proudly follow the news and pictures from lectures, conferences or other events... The best thing, however, is that I am always welcome at all these events and I can enjoy our reunions.
